

From the Editor

Dear readers, colleagues!

You have received the second issue of our journal in 2018.

In this issue we publish 26 articles (four large scientific reviews, 15 original scientific articles (including one article in English) and 7 clinical cases (3 of them - in English).

I am sure that we are working in the right direction - we are increasing the number of published articles without reducing the requirements for the scientific quality of the presented material. The electronic format of the journal allows not limiting the quantity and quality of the illustrative material, which is extremely important in the field of diagnostic radiology.

Since the beginning of this year all incoming articles have been tested with the help of the professional extended version "Antiplagiat system". Once again I want to address our authors: please, check the materials sent to the editorial board for compliance with all the journal requirements. This will help us quickly bringing your scientific data to our readers in the future.

As always, we are waiting for your comments and suggestions aimed to improving the quality of our journal.

**Sincerely,
Chief editor
Academician of the Russian Academy of Sciences
S.K. Ternovoy**
