

Letter From the Editor

Dear colleagues, friends!

You are reading the first issue of our magazine in 2019 year. In this issue you will find 17 original articles, 4 scientific reviews and 10 clinical cases in different areas of radiology. As you can see, the geography of publications has significantly expanded and we are receiving more articles in English language.

We actively use the antiplagiat system to analyze incoming publications. Three articles were returned to their authors for revision. I want to remind everyone that the usage of large text parts without references from your own previous works is not accepted and sending back to the authors. I am asking the authors to pay attention to this and I will be grateful to everyone for your precision!

All the materials, as before, are going through the double blind review and this gives its results – all published materials are of consistently high scientific quality.

I am pleased to inform you that according to the results of 2017 year (the last published official rating), our magazine has an impact factor of RINC 0.475. This is the highest rating for the journals of our profile.

I am sure that together with our authors and numerous readers, we will go further and be able to increase our successes.

We are waiting for your comments and suggestions.

**Sincerely,
Chief Editor
Sergey Ternovoy**
