

Letter From the Editor

Dear Colleagues!

We begin this issue of the Russian Electronic Journal of Radiology with sad news. Our friend and member of the editorial board, Professor Viktor Ivanovich Amosov, has passed away... Viktor Ivanovich was a bright scientist, a highly professional specialist who has trained several generations of doctors. We will remember him as a kind, open and sincere person, whose shoulder was there in any situation. We are confident that the work implemented and planned by Viktor Ivanovich will be worthily continued by his students. Bright memory...

In the second issue of REJR, we present 10 original articles and 4 clinical cases that will be interesting to specialists in various radiological modalities. We remind you that our journal is open to any reviews and we gratefully welcome your feedback, suggestions, as well as the results of scientific researches or rare clinical cases that may be useful to our colleagues.

Happy reading!

Until we meet again!

Chief editor

A handwritten signature in black ink, which appears to read "Н. Серова" (N. Serova).
