

## From the editor

### Dear colleagues!

Another issue of the Russian Electronic Journal of Radiology is published.

This issue is made as the previous one – there are original articles, and case studies, and a master class.

However, this issue is a little unusual. Its publication coincided with the VI national Congress of radiology and radiotherapy, which was held from 30 May to 1 June.

First time the issue is accompanied by an application in which are published materials of the Congress “Radiology 2012”. These materials were presented to all delegates in electronic form!

I really hope that you will enjoy the journal, and it will be easy and convenient to work with the Congress abstract, published in the supplement.

Glad to inform you that the quantity of journal subscribers are more than 2,000 people, and the REJR site is gaining popularity because of the constantly updated section “news”.

Write to us! We expect from you not only scientific articles, but suggestions and comments about content and design.

Sincerely,

Editor in chief REJR, S. K. Ternovoy
